

HAMMER MOBILE FALL ARREST SYSTEM

Part # Description

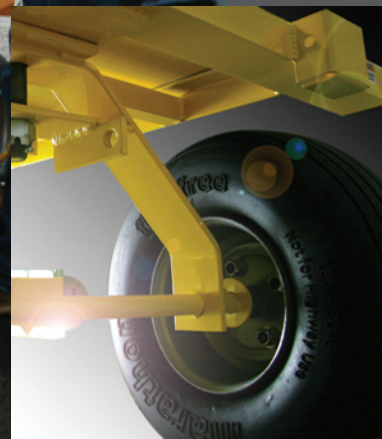

14000 Hammer Mobile Fall Arrest System

The Hammer Mobile Fall Arrest System is the ultimate in mobile fall protection safety. On large jobs, often the ideal anchorage point is one that can be moved as you finish work in one area and move on to another. Mobile anchor points can provide fall arrest and fall restraint where no other anchorage point exists.

Designed as a mobile anchor point, up to three (3) workers can be tied off to the Hammer Mobile System for fall arrest. It can also accommodate two (2) additional workers in fall restraint. Sometimes finding a good anchor point is difficult. Using the Hammer Mobile Fall Arrest System, you always have a rated mobile anchor point!

GUARDIAN
FALL PROTECTION
PERFORMANCE SAFETY GEAR

1 MOBILITY

8" Solid Flat-Proof Tires make mobility easy.

2 MOBILE ANCHOR POINT

Perfect for use with Guardian Self-Retracting Lifelines.

3 SOLID STEEL DESIGN

No water tanks or counterweights. The solid steel design of the Hammer makes counterweights unnecessary.
