Saves on Labor Costs

Ergonomically Friendly

SAVE TIME. SAVE YOUR CREW.

"Our employees prefer this method of insulation fastening because the tool is easy to operate, reliable and reduces back fatigue."

Brian Cislo *Purchasing Manager*
Royal Roofing, Orion, Michigan

"I was very skeptical when first seeing the tool. It seems that someone is always producing tools that 'make the job faster and easier,' a sales pitch I have heard a thousand times without the results. But the ergonomics, productivity, simplicity and durability of the tool has surprised me. My field techs are singing praise to the AccuTrac tool."

Dan Johnson *VP Operations*
Wayne's Roofing, Inc., Sumner, Washington

AccuTools do the work of two men, allowing you to redistribute job-site labor.

The AccuTrac family of stand-up insulation and membrane attachment tools from OMG Roofing Products offers a more productive and healthier alternative for installing roofing fasteners. These easy-to-use, automated tools provide the lowest installed cost for securing insulation and thermoplastic roof membranes, and can dramatically increase your rooftop productivity!

THE RIGHT TOOL MAKES ALL THE DIFFERENCE

There are three options available: AccuTrac for insulation attachment, AccuSeam for installing seam plates, and RhinoTrac for installing RhinoBond plates. In one motion, the tool aligns the plate as the operator drives the fastener, doing the work of two and saving valuable time and resources.

Since each fastener is properly aligned perpendicular to the surface of the roof, the system helps ensure maximum thread engagement, pullout resistance, and a better overall installation.

MORE PRODUCTIVE AND HEALTHIER, TOO

In addition to being more productive, the stand-up tools are healthier for your crew. According to labor statistics, work-related stress injuries are common among workers such as roofers who handle tools, materials and heavy equipment every day.

Repetitive bending, kneeling, reaching and twisting can contribute to musculoskeletal disorders (MSDs). These injuries to muscles, nerves, tendons, ligaments, joints, cartilage and other soft tissue are especially common among roofers, and can result in life-long debilitating damage. Moreover, MSDs are costly in terms of lost productivity, increased insurance claims, higher health care costs and lost time.

The traditional method for fastening insulation and membrane in low-slope roofing requires roofers to work in awkward, bent-over or kneeling positions, all day, in extreme heat or cold, often for many days at a time; exactly the scenario that can lead to MSDs.

These ergonomically correct* stand-up tools eliminate the need for continuous bending, twisting or kneeling in order to mechanically fasten insulation, keeping your crews more productive and at less risk of contracting an MSD.

*Ergonomic Technologies Corporation suggests roofing contractors use "screw guns that allow workers to stand while working." From "Ergonomic Solutions for Roofing Tasks" Published by CNA 2005

COMPARE THE LABOR STEPS

AccuTrac, AccuSeam and RhinoTrac can help you get ahead of schedule, allowing you to redistribute job-site labor to handle time-consuming detail work or other tasks. The chart below shows the possible productivity gains compared to the labor steps and time to install loose plates and screws or pre-assembled fasteners.

LABOR STEPS				
Method	Step 1	Step 2	Step 3	Step 4
Loose Screws & Plates	Place Board or Membrane	Place Plate	Place Screw	Drive Screw
Assembled Screws & Plates	Place Board or Membrane	Place ASAP	Drive ASAP	
AccuTrac or RhinoTrac System	Place Board	Install Screw & Plate using Tool		
AccuSeam System	Roll Out Membrane	Install Screw & Plate using Tool		

Time →

ADAPTABLE

The AccuTrac, AccuSeam and RhinoTrac tools are fully interchangeable: The upper drive assembly can be quickly detached and connected to any "boot" for easy changeovers between fastening tasks. Each boot is available separately, so you don't have to invest in three complete systems.

1 Drive System
+ 3 Boots
= Better Functionality

Other Benefits

- Universal drive system fits all three tools
- Depth adjustment helps prevent over- and under-driving for a better installation
- Large capacity plate "wells" hold 100+ plates for maximum productivity
- Rigid caster wheels improve maneuverability
- AccuSeam's built-in measuring tail assists in accurate 6-in. or 12-in. O.C. spacing
- AccuSeam has removable wheel extensions facilitate easy use around walls and curbs

AccuTrac improves production and lowers installation costs.

AccuSeam has a measuring tail for accurate spacing and removable wheel extensions for walls and curbs.

RhinoTrac eliminates over- and under-driving of RhinoBond plates for optimal welding of thermoplastic membranes.

"We believe that by using these tools, we are installing the roof insulation on our projects in the fastest and most cost-effective method available."

Stephen P. Johnson *President*
McPhillips Bros. Roofing
St. Paul, Minnesota

NATIONWIDE CUSTOMER SUPPORT

OMG is the leading U.S. manufacturer and supplier of roofing fasteners, roof insulation adhesives, retrofit roof drains, pipe supports, roof repair tape and engineered edge metal systems.

When it comes to service, OMG Roofing Products has a nationwide network of field sales representatives available to help. We're there when you need us for product demonstrations, training, job starts and more. Let our local sales representative help with your next project.

For more information or an on-site demonstration, please call 800-633-3800.

VERSATILE

All of these stand-up tools work with OMG-manufactured #12 Standard RoofGrip, #14 Heavy Duty and #15 Extra Heavy Duty Roofing Fasteners in lengths through six inches. A universal drive shaft accepts hex, Phillips and square driver bits. In addition, the insulation attachment tools are ideal for use on all insulation types including hard-boards such as DensDeck® and Securock®.

Each tool holds a plate specific for the application: AccuTrac holds square AccuTrac insulation plates; AccuSeam holds round, barbed Eye Hook® seam plates; and RhinoTrac holds specially coated plates for RhinoBond® induction welding.

APPROVALS

The AccuTrac system is approved by, and available through, most roofing system manufacturers as well as through OMG Roofing Products' extensive distribution network.
